

Gandire Critica - rezolvarea problemelor

■ Introducere

- Necesitatea creării unui program de conștientizare și educație pentru a face față cerințelor de promovare a societății informaționale - societatea cunoașterii trebuie să fie luată în considerare cu atenție.
- În acest sens, gândirea critică este o cerință principală pentru societatea informațională - societatea cunoașterii.

At the end of this session, learners will be able to: (1)

- Develop senior people's understanding and tolerance for the community and the desire to learn from those for whom they want to make a Community-based Learning Community Service Project.
- Describe the importance of the community for the success of a Community-based Learning Project.

At the end of this session, learners will be able to: (2)

- Define community-based learning
- Make the distinction between community service learning and community service.
- Manifest empathy and respect for different groups in the community (social intelligence)
- Demonstrate openness to community involvement through community-based Learning Projects (Teamwork).

■ What is Critical Thinking?

○To think critically means to be curious, to ask questions, to seek answers, to search for causes and implications, to find alternatives to already established attitudes, to adopt a position on the basis of reasoned justification and to logically argue the arguments of others.

Methods of critical thinking development (1)

The methods for critical thinking development are integrated into a specific teaching-learning framework, structured in three phases:

1. Evoking - students are asked to remember what they know or what they think, they know about the topic to be addressed;

Methods of critical thinking development (2)

2. Making sense - Students get in touch with new content

3. Reflection - marks the moment when students truly acquire new knowledge, expressing them in their own words.
